c Filtering power by criterion
Model specific 85%
Estimand 56%
Parametric nature 50%
Functional form 44%
Requires explicit processes 36%
Usage 34%
Number of variables 32%
No unobserved confounders 30%
Handles lag effects 30%
Exposure type 29%
RS-data proven 28%
IID 27%
Handles few samples 27%
Handles missing data 27%
Handles huge datasets 27%
No interference 25%
Faithfulness 24%
Propagates uncertainty 23%
Data type 22%
Common support 20%
Well-defined treatments 19%
Causal Markov condition 14%
Language 13%
Time-series length 10%
Bars are overlaid, not stacked: the end of each bar marks the share excluded when 1, 2 or 3 options are selected (Multiple criteria; Ordinal criteria allow 1).
